EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Scott A. Stinebruner on May 16, 2008.

2. The application has been amended as follows: Claim 40 has been amended to overcome 35 U.S.C. 101 issues. Claim 41 has been canceled.

40. (Previously Presented) A program product, comprising:

(a) a program configured to display a pictorial representation on a computer display, the pictorial representation associated with a plurality of hardware components and representing a physical configuration of each of the plurality of hardware components that conveys a relative placement and location of at least a subset of the hardware components in physical space, wherein each of the plurality of hardware components is associated with at least one attribute, the program further configured to indicate, in response to user input, a selected status for multiple hardware components from the plurality of hardware components within the pictorial representation associated with the plurality of hardware components; to dynamically retrieve a list of available management operations associated with at least two selected hardware components among the multiple hardware components having a selected status after indicating the selected status for the multiple hardware components; to display the list of available

management operations within a context sensitive menu after indicating the selected status for the multiple hardware components; and to perform a management operation from among the list of available management operations on all of the multiple hardware components that have a selected status responsive to user input directed to the context sensitive menu, wherein the program is configured to indicate the selected status by selecting a filter criterion from a plurality of predetermined filter criteria, comparing attributes associated with the plurality of hardware components against the selected filter criterion, and selecting those hardware components associated with attributes that match the selected filter criterion, wherein the pictorial representation continues to depict at least one non-selected hardware component after such selection, wherein each of the plurality of predetermined filter criteria is associated with a predetermined view among a plurality of views, and wherein the list of available management operations includes only management operations that are appropriate for being performed on all of the multiple hardware components having a selected status; and

(b) a ~~physical computer-readable signal-bearing~~recordable medium bearing the program.

41. (Canceled).

Response to Appeal Brief

3. The Examiner acknowledges Applicant's submission of the Appeal Brief on 3/24/08. The arguments presented in the Appeal Brief are persuasive. Claims 1-4, 8-12, 14-16, 18-26, 30-32, 34, 35 and 37-40 are allowed.

Allowable Subject Matter

Art Unit: 2173

4. Claims 1-4, 8-12, 14-16, 18-26, 30-32, 34, 35 and 37-40 are allowed.
5. The following is an examiner's statement of reasons for allowance: With respect to independent claims 1, 23 and 40, the combination of Fox, De Jong and DeKoning disclose managing hardware components through the display of a representation of the hardware components. The user interface displays a pictorial representation associated with the plurality of hardware components representing the physical configuration of the plurality of hardware components. Prior art combinations do not properly disclose in combination with the features of the independent claims, selecting a filter criteria from a plurality of predetermined filter criteria associated with a predetermined view among a plurality of views. In combination to the above feature, the independent claims further recite dynamically retrieving a list of available management operations associated with at least two selected hardware components among the multiple hardware components having a selected status. The combination of the features disclosed in the independent claims have not been previously disclosed, where this combination of features would not be obvious over prior arts.

Since claims 2-4, 8-12, 14-16, 18-22, 24-26, 30-32, 34, 37-39 depend on claims 1 and 23 and include all of the limitations of these claims, claims 2-4, 8-12, 14-16, 18-22, 24-26, 30-32, 34, 37-39 are considered allowable for the reasons in which claims 1 and 23 is allowable.

. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

6. Applicant's arguments, with respect to the rejection not disclosing a selecting a filter criterion from a plurality of predetermined filter criteria, each of the predetermined plurality of predetermined criteria associated with a predetermined view among a plurality of views have been fully considered and are persuasive. The rejection of claims 1-4, 8-12, 14-16, 18-26, 30-32, 34, 35 and 37-40 has been withdrawn.

Conclusion

7.
